FILTER CARTRIDGE**

**4717-87  
(47170)**

**For Removing Silt And Sediment Down To 5 Microns And  
For Eliminating Lime Scale Formation**

Will treat up to 27 gallons of water (250lbs. of ice) per day for six months

2611 Schuetz Rd. • St. Louis, MO 63043 • 800-554-5499 • [www.nucalgon.com](http://www.nucalgon.com)

**Directions for Installing/Replacing Cartridges:**

Turn off the water supply to the NP48DD unit. Press the red pressure relief button and unscrew bowl counter clockwise. Discard old cartridge. The O-ring in the housing should be inspected and lubricated as necessary. Remove outside wrapper from the new cartridge and install in bowl.

Under normal circumstances treatment will last for up to six months. Date this canister upon installation, and replace it in six months.

This filter should not be used where the water is microbiologically unsafe or with water of unknown quality without adequate disinfection before and /or after the system.
