

# Nu-Plus HFS-S

**Scale Inhibitor, Taste & Odor Reduction  
& Sediment Reduction**

Capacity:	40,000 Gallons
Flow Rate:	3.4 GPM
Micron Rating:	.2 Micron
Operating Pressure:	20-125 PSI
Operating Temperature:	35°-100° F

Tested and Certified by NSF International against NSF/ANSI Standard 42 and 53 for the reduction of Cyst, Chlorine Taste and Odor.

Flow rate and filter capacity refer to the individual filter only. For systems containing multiple filters, refer to the system installation manual for specifications.

Replace the cartridge every 12 months to ensure proper filter performance and continued reduction of lime and scale build up. The cartridge capacity may vary according to flow rate, inlet line pressure and local water conditions, which may require more frequent cartridge replacement.

Check for compliance with state and local laws and regulations. Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Systems certified for Cyst reduction may be used on disinfected waters that may contain filterable Cyst. The contaminants or substances reduced by this filter are not necessarily in your water. Not for residential use. Food service applications only. For additional product information, please refer to [www.nucalgon.com](http://www.nucalgon.com).
